

ERAU Sport Aviation Club

Mr. Muehlbauer,

The entire Embry-Riddle Sport Aviation Club would like to extend our sincere thanks to you and the wonderful folks at MT Propeller for your recent hard work on our Pitts S2B. Without the superior product support that MT offers, we would have been without our Pitts during the recent Keystone Aerobatic Competition. Just a day prior to the competition, our Pitts developed an issue with its propeller. Under normal circumstances this would have grounded the Pitts for weeks. Luckily for us, we were not dealing with a normal propeller company. The amazing people at MT worked hard and late into the night and were able to have our Pitts back up and running in time for the competition! In the competition, we had eleven collegiate competitors; many were first time competitors who have been introduced to aerobatics and sport aviation thanks to the generosity of MT Propeller. We flew the Pitts proudly and carried on the tradition of making MT the "Winner's Propeller".

The club's Pitts S2-B, N260AB, is one of the highest time Pitts in the nation and is flown more than probably any other Pitts in the world. For years we have enjoyed the high performance, smooth, and reliable operation of our MT propeller. We fly the aircraft hard and often with multiple aerobatic training flights each day. Our MT propeller has provided us with unmatched performance and reliability on each and every flight! Your product support has also been as fantastic as the products themselves. The Pitts is not the only airplane we enjoy thanks to MT Propeller. Our club also operates a 90HP J3 Cub which came with the original wooden propeller, plaguing the aircraft with vibration problems. Once we installed a new MT composite propeller, the vibrations ceased and the Cub became an entirely different aircraft. We have since enjoyed smooth operations and dramatic increases in all performance figures on the aircraft. The MT propeller has made a world of difference!

The generosity of your company has enabled our club to carry on its mission of introducing young adults to the world of sport aviation. Your products have proven their reliability and high performance even under the most harsh, high utilization training conditions. We look forward to catching up with you at Sun N' Fun and would love to take a chance to tell anyone and everyone about the amazing products and support that MT has to offer. We will be sure to stop by the MT booth and would be proud to supply any potential customers with a resounding endorsement of your company, its products, and its support. (Attached) Please find the pictures of the collegiate competitors who were able to compete at the Keystone Aerobatic Competition only because of the generosity and support of MT Propeller!
