Advantages (Performance data are based on MTOW, ISA)

- Best vibration damping characteristics for almost vibration free propeller operations!
- Bonded on nickel alloy leading edge for best erosion protection of the blades!
- General performance improvement (10% shorter take-off distance, 10% better climb!
- Performance, 3 kts faster in cruise)!
- Approx. 3 lbs less weight than the original metal propeller!
- Cooler ITT on ground with condition lever at low and high idle position!
- No propeller speed restrictions on ground while operating in low idle!
- Unlimited blade life! FOD repairable blades!
- More ground clearance => less FODs!
- Jetlike vibration and noise signature! Significant cabin noise and vibration reduction!
- All models comply with the strict German noise regulations 2010- „Landeplatz !
Lärmschutz Verordnung" for unrestricted airport operations in Germany and other European Countries!
